

Good Life Foundation conducted a series of research and assessments in the Democratic Republic of Congo, within a five year -period, through which this foundation here by appeal, in recognition of acquired consummate understanding over problematic upon shrieking levels of deforestation, on quest of wood fuels (Charcoal and firewood) and its complexity on ground, its imposed peril and endangerments to more than 90% of Congolese households , to regional and global populations by day to date burning of the world second largest ecosystems(the Congo Rain Forest), matter worsening by intertwined severities of deforestation happening in neighbor countries such as, Burundi and Uganda; all grafted to the range surpassing levels of pauperdom and disability of populations living in war and conflicts affected countries, regionally, and put in account the political instability alimenting electricity shortfall in the East and central regions of Africa; they are factors that led Good Life Foundation to delegate astuteness in collaboration with communities to design the **LIQUEFIED PETROLEUM GAS CLEAN COOKING ENERGY IN QUINTUPLET IMPACT PROJECT**, in acronyms of LP GCCE-QIP- #1- DRC. The project intendedness is implementation in the Democratic Republic of Congo and find extension to the entire region, as ultimate solution to deforestation and climate rehabilitation.

Project proposal link:

The project is purposed to:

1. Conduct nationally sized and road mapped community and institutional awareness, that drive twisting of traditional behavior and culture of community cooking into innovated Clean Cooking Energy for human and environmental safety.
 2. Deliver LP Gas starter equipment (Cylinders etc.) coupled with socio- economic empowerment of beneficiaries; they are Disabled, poorest of poor individuals and render them the Environment Watchdogs nationally and regionally.
 3. Promote environment protection and formal education together.
 4. Innate medical research oriented to fight carbon dioxide and other gasses' toxicity.
 5. Promote activities targeting food production scaling up by solar powered solution in irrigation.
-

By the current phase, this foundation is pulling in with advocacy, fund-raising to meet required resources to potentially enable implementation of this project; either in fully funding scheme or in components funding separately.

Good Life foundation expresses gratitude to any volunteer, willing to help addressing the environmental shambles clogging up worldwide climate, rescuing the World second largest natural forest.
